SMART SROAT 1002

ELECTROMAGNETIC FLOW METER SROAT - 1002

INTRODUCTION

Manas have now introduced a new type of primary flow sensor and smart flow transmitter in their electromagnatic flowmeter series. This sensor works on the Faraday's law of electromagnatic induction. The meter is true volume mesuring meter. The measurement is independent of Viscosity, Density, Dissolved/Undissolved solids, pressure or temperature of the following liquid as long as it maintains certain

minimum conductivity. Various types of Liner and Electrode materials are available as per application requirements. The new sensors are more compact in size and more sensitive. Earth ring or earth electrode, both options are available. Empty tube detection is also provided.

PRINCIPLE OF OPERATION

The SROAT 1002 series Electromagnetic Flowmeters work on the Faraday's law of Electromagnetic Induction. It, in brief, states; when a conductor moves within a magnetic field, voltage is induced in it which is proportional to the velocity of conductor. In this case the conductor is flowing media.

The equation is as below:

E = B.V.D

Where,

- E Induced voltage (proportional to velocity)
- B Magnetic flux density
- V Mean velocity of the media
- D Diameter of flow-sensor

(distance between the sensing electrodes)

For a given size of flow tube and compatible amplifier the flux density 'B' is constant, the distance between the electrodes is constant. Hence, the induced voltage is proportional to the flowing media. Thus the meter can be calibrated in terms of volumetric flow rate by knowing the cross-sectional area of the tube.

PRINCIPAL ADVANTAGES

DIAGRAM

- Robust, rugged, welded steel/stainless steel construction with standing to IP65
- · Very much suitable for submerged or buried application
- **TYPICAL ERROR** 2.5 2.0 **%ERROR OF ACTUAL FLOW** 1.5 1.0 0.5 0 -0.5 -1.0 -1.5 -2.0 -2.5 10 20 30 40 50 60 70 80 90 FLOW AS PERCENTAGE OF RANGE

- No Pressure Drop across the sensor, being full bore construction
- Measurement independent of un-dissolved solids
- Long lasting Ebonite rubber lining gives long life of sensor
- · End connection flanges as per customer's requirements

APPLICATIONS

The flow meter can be used to measure various types of fluids which can be found across various industrial processes. The accurate readings of meter keeps the operator always alert about flow rates of Medias of process.

100

Some of the application areas of meter:

- · Effluent treatment plants
- Sewage treatment plants
- Water supply schemes
- Steel Industry
- Sugar Industry and distillery
- Pulp and paper
- · Chemical and pharmaceutical
- Food and Drug

Specifications

Primary Sensor (SROAT 1000)

	Meter	: DN 10 to DN 350
	Operating Ambient Temperature	: 0-60°C
	Sensing Measuring Electrodes	: 2 Nos.
	Earth Electrodes	: 1 No.
	Empty Tube Electrodes	: 1 No.
	Material of Construction	
	Pipe	: SS 304 (Non magnetic)
	Electrodes	: SS 316 / SS 316 L Hastelloy C or Others as per compatibility with liquid
	Liner	: Soft or Hard Rubber / Neoprene / PTFE / PFA / Other (as per requirements)
	Flanges	: MS / CS / SS 316 / SS 304 SS 316L
	Coil Housing	: MS / Carbon Steel PU Painted / SS 304 / SS 316
	Flanges Standard	: ANSI / DIN / BS Flanges (as per requirement)
	Power Supply to field coils	: Pulsed DC through Transmitter

Transmitter (SS 1002)

Mounting	: Integral / Remote
Enclosure	: Aluminum Die Cast (For Amplifier or Transmitter)
Dimensions	: 175mm * 100mm * 80mm (Integral mounting) 215mm * 100mm * 95mm (Remoted mounting)
Cable glands	: PG-11 (Standard) (Note: Other on request)
Power Supply	: 85V to 265V ac, 50hz
Operating Temperature	: 0 - 50°C
Temperature drift	: 0.015% / °C maximum of Full Scale
Humidity	: 90% of R.H. maximum non-condensing
Media Conductivity	: ó > 20µS/cm
Local Display	: 16 characters X 2 rows LCD display for instantaneous Flow rate, Totaliser, Eng. Units, Fault messages, etc.
Operating Velocity Range	e : Up to 0.3m/sec to 10m/sec
Accuracy	: ±0.5% X (±1 mm/sec) of Actual Flow Rate between 100% to 10% of calibrated range
Reference Conditions	: Power Supply Nominal 230V ac, ±10% Temperature : 25°C ± 2°C

Repeatability	: \pm 0.1% of reading
Ingress protection	: For Integral : IP 67 For Remote : IP 68
Keyboard	: 4 magnetically / manually operated keys for parameter
	programming. (Note : A magnetic pen used to operate the keyboard without opening the cover of transmitter box)
PC communication	: RS232 / Rs485 (Protocol MODBUS RTU)
Electromagnetic Compatibility	: As per IEC 61326-2-3 & IEC 61000-3-2; 2006

Service Conditions

Service Liquid	: Compatible with Liner & Electrode ó > 20µS/cm	
Media Pressure	: Up to DN80 From DN100 to DN200 From DN250 to DN350	- PN 40 - PN 16 - PN 10
Media Temp.	: From Hard Rubber For Neoprene For Soft Rubber For PTFE For PFA	- 0 - 90°C - 0 - 90°C - 0 - 90°C - 0 - 150°C - 0 - 200°C

FLOW RATE TABLE

(Flow rate at v = m/s)

DN	M3/Hr.	LPM	LPS
10	0.282	4.712	0.078
15	0.636	10.602	0.176
